APPEARANCE REFERENCE EDITION

Find a finish.

Build the details together.

47 appearance references for doors, wall panels and cabinetry discussions. Select a public ID, tell us where it will be used, and review the project configuration with Sean.

This is a reviewed derivative of the owner-supplied 2026 Color & Texture guide. Original page numbers and image positions are retained beside each reference. Technical configuration tables and unverified claims are excluded.

Screen appearance only. Woodgrain names describe appearance, not solid wood or origin. Substrate, surface process, dimensions, availability and sample terms are to be confirmed for your project. A selection is not an approved sample or an order.

MIAOKE

FROM PREFERENCE TO PROJECT CONFIRMATION

01 Choose the appearance

Use the public ID, original page and image position when discussing a colour. Similar names and separate finishes are not automatically interchangeable.

02 Tell us where it will be used

Describe the intended door, wall or cabinet area, project location, approximate quantity and relevant drawings. Compatibility is checked for that request.

03 Review with Sean

Sean confirms the material, finish process, exact dimensions, applicable evidence, availability and sample terms. Catalogue names and pictures are reference material.

04 Approve the project sample

Any physical sample approval belongs to your customer and project record. A web selection or download never creates global approval for a finish.
