

Spaces that work together.

Interior doors, walls and cabinetry.
Glass-door and partition references.

Use this guide to point to a visual direction. Share the reference ID and source page with Sean so the right materials, dimensions and details can be reviewed for your project.

93 visual references

75 printed model codes + 18 uncoded flush-door references

Original source: 75-page English catalogue. Selected visuals are re-edited into this separate R2 reference edition.

Sean | sales@miaokehome.com

WhatsApp +86 18727017592

Catalogue illustration - not a documented customer project.

A preference is the start of a conversation.

01 / Choose a visual

Browse a door, glass system or flush-door appearance. Model codes reproduce catalogue labels. They are reference identifiers, not confirmed stock or configuration guarantees.

02 / Keep the location

Copy the public ID, original source page and labelled position. Multiple models can share an image. Keep the specific ID for each item you like.

03 / Tell us where it goes

Share country, project type, quantities, product use, opening details and requirements. Final substrate, dimensions, finish, hardware, glass, installation and compatibility remain to be confirmed.

04 / Confirm with Sean

Sean reviews the requirements and discusses sample terms. Any physical sample approval belongs to one named customer and project; it is never a global approval of a finish or model.

Colour names describe an appearance and do not prove a wood species, solid wood, veneer or material composition. Screen and print appearance can vary. This R2 edition does not reproduce unverified factory/platform metrics, door-opening limits, steel grades, glass thicknesses or certification claims.

Accessories to discuss

Use the visible position to discuss slatted profiles, skirting, handles, a jamb or trim, a door stop and hinges. Materials, finish matching, construction and the exact mechanism are to be confirmed. A picture does not establish compatibility.

Visual reference only. Model-specific configuration and approval remain to be confirmed.

Opening arrangements

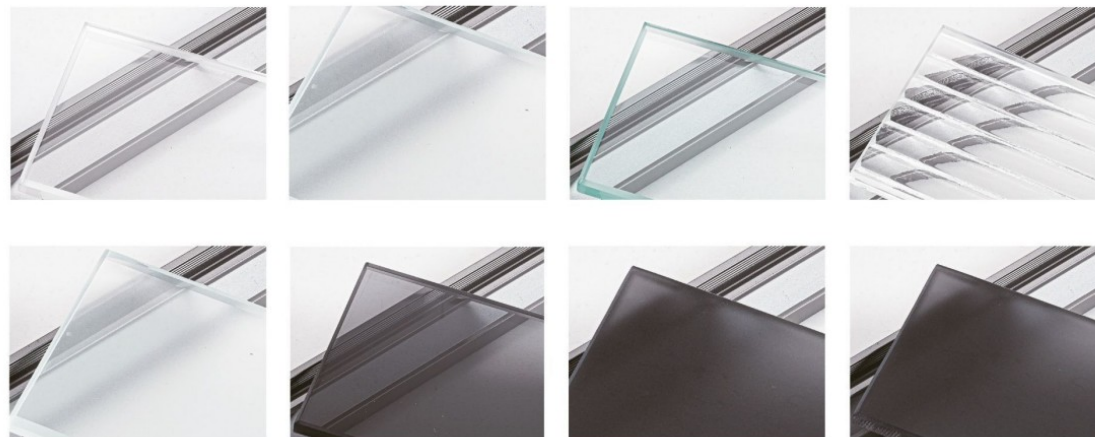

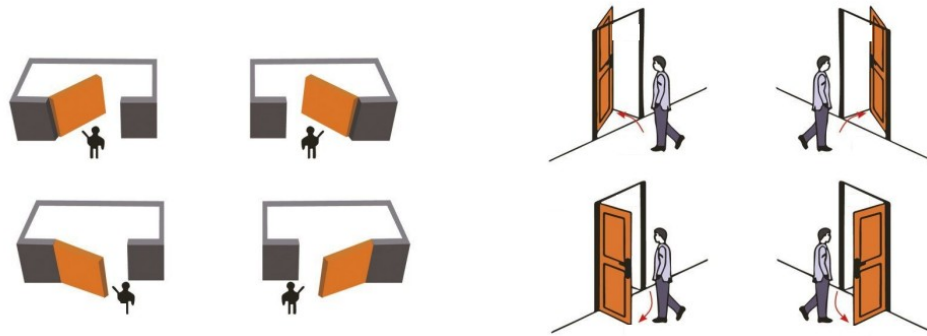

Point to a row and column: R1-C1 starts at the upper left. Send a sketch with the inside/outside viewing side, fixed panels, moving panels, clearances and required operation. Sean confirms a model-specific drawing; these diagrams do not promise every mechanism for every door.

Visual reference only. Model-specific configuration and approval remain to be confirmed.

Glass appearance and handing

PAGE
73/74

The glass grid has two rows and four columns. Identify the appearance by row and column. Confirm glass build-up, thickness, safety requirements, opening direction and hardware with Sean. Handing depends on a defined viewing side and the approved project drawing.

Visual reference only. Model-specific configuration and approval remain to be confirmed.
